Question 2

1 point possible (graded)

It has been observed that phone calls durations can be modeled by an exponential distribution. The average duration of a phone call is 3 minutes. What is the parameter μ of the corresponding exponential distribution?

Select the correct answer(s).

- ☐ 1/3

- ☐ 1/3 min

- ☐ 1/3 min^{-1}

- ☐ 20 hour^{-1}

- ☐ 20 sec^{-1}
